

# CipherTrust Transparent Encryption

## Patch Release Notes for Windows Agents

- **Release 7.2.0.160**
- **Date: May 27, 2022**
- **Document Version 1**

## Resolved Issues

- **AGT-37927 [CS1126208]: System crash due to memory corruption**  
CTE agent updated the memory beyond its allocation size. Specifically, CTE agent incorrectly updated the 1 byte beyond its allocation. This issue has been fixed in the current patch release.
- **AGT-38945: [CS1310061]: Performance issue on production MSSQL cluster servers**  
The issue was caused by a CTE driver attaching to raw volumes when ESG was disabled. Windows was continuously mounting raw volumes. Each raw volume instance created, consumed large amounts of memory until system performance degraded. The solution was to prevent the driver from mounting the raw volumes when ESG is disabled.

**Note:** After installing the 7.2.0.160 patch, disable ESG before rebooting, type: `voradmin esg feature disable`

- **AGT-39056: [CS1309653/CS1320446]: Failed to guard drive path**  
CTE agent failed to open the GuardPoint MetaData Alternate Data Stream. CTE agent was incorrectly getting the Volume Information and hence, failed to open the MetaData file. This issue has been fixed in the current patch.

## Sales and Support

If you encounter a problem while installing, registering, or operating this product, please refer to the documentation before contacting support. If you cannot resolve the issue, contact your supplier or Thales Customer Support.

Thales Customer Support operates 24 hours a day, 7 days a week. Your level of access to this service is governed by the support plan arrangements made between Thales and your organization. Please consult this support plan for further information about your entitlements, including the hours when telephone support is available to you.

For support and troubleshooting issues:

- This document shall not be posted on any network computer or broadcast in any media and no modification of any part of this document shall be made.

Use for any other purpose is expressly prohibited and may result in severe civil and criminal liabilities.

The information contained in this document is provided "AS IS" without any warranty of any kind. Unless otherwise expressly agreed in writing, Thales makes no warranty as to the value or accuracy of information contained herein.

The document could include technical inaccuracies or typographical errors. Changes are periodically added to the information herein. Furthermore, Thales reserves the right to make any change or improvement in the specifications data, information, and the like described herein, at any time.

**Thales hereby disclaims all warranties and conditions with regard to the information contained herein, including all implied warranties of merchantability, fitness for a particular purpose, title and non-infringement. In no event shall Thales be liable, whether in contract, tort or otherwise, for any indirect, special or consequential damages or any damages whatsoever including but not limited to damages resulting from loss of use, data, profits, revenues, or customers, arising out of or in connection with the use or performance of information contained in this document.**

**Thales does not and shall not warrant that this product will be resistant to all possible attacks and shall not incur, and disclaims, any liability in this respect. Even if each product is compliant with current security standards in force on the date of their design, security mechanisms' resistance necessarily evolves according to the state of the art in security and notably under the emergence of new attacks. Under no circumstances, shall Thales be held liable for any third party actions and in particular in case of any successful attack against systems or equipment incorporating Thales products. Thales disclaims any liability with respect to security for direct, indirect, incidental or consequential damages that result from any use of its products. It is further stressed that independent testing and verification by the person using the product is particularly encouraged, especially in any application in which defective, incorrect or insecure functioning could result in damage to persons or property, denial of service or loss of privacy.**
